LATEST CHINA SCHEDULES ARE AS FOLLOWS: DU9RG runs lists for BY5RA and sometimes BY4AA Wednesdays at 1200Z on 14.180 MHz. On 8/29 he began with the list which had been taken the previous Wednesday. DU9RG also conducts a schedule Saturday mornings at 1200Z on 14.155 for either BY1PK or BY4AA.

JA8YDY/S21 Bangladesh operation Aug 3 and 4 was, according to a JA source, not authorized. A number of stations were worked on 20 and 15, both phone and CW, from Dhaka, using a tribander" "at a certain location." The Bangladesh Amateur Radio League is now an IARU member, so things may open up there soon.

SV1SQ's recent request for Mt Athos permission in September has been turned down, possibly due to the current flap over documentation problems of DJ5CQ/SV/A. Readers seeking insight into the workings of the Roman Catholic Church and its effect on both Mt Athos and the Sovereign Military Order of Malta are referred to David A. Yallop's In God's Name (Bantam Books), an investigation into the murder of Pope John Paul I in 1978.

XU1SS Sunday schedules should begin again this week or next; list-master VS6CT has been away from Hong Kong the past several weeks. These schedules have been maybe 50% successful into North America, 14.245 at 1200Z.

According to DX Report (published in Canada), 5X5GK has neither a VE nor a 5X license! Oh, well. 5U7LD still doesn't count for DXCC either, but KC7UU/5N is thinking about an operation from there this Fall. IN3RZY does send out 5U7LD QSLs.

SAN FELIX CEØAA ON NOW!

THE CHILEAN RADIO CLUB AND THE CHILEAN NAVY are sponsoring CEØAA from San Felix Island, scheduled to begin about Sep 4 and last 45-60 days. Operating will be by "amateur licensed" navy personnel named Max and Fernando (no calls mentioned). They will be using two TS830s, a TS-120, tribander and dipoles on 80-10 Meters.

These operators, according to Chilean Radio Club officer CE3GN, know very little English, "and your cooperation in following their instructions is most important. They are new to amateur radio and have very little experience in handling pileups."

The pileups will ge gigantic, because:

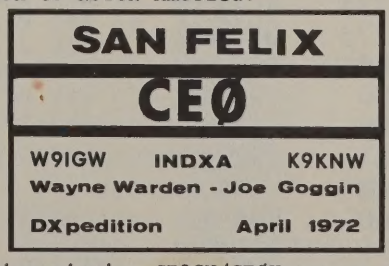
***Every ham first licensed after April, 1972, needs San Felix.

***Many hams licensed earlier need San Felix on 'Phone, because the 1972 operation by W9IGW and K9KNW was primarily CW.

***Every ham working on CW DXCC needs San Felix, regardless of how long they've been licensed.

***More DXers will be calling CEØAA than, say, were calling last winter's Laccadives expedition, because propagation, especially to North America, will enable DXers with modest stations to hear the expedition well.

IF THESE OPERATORS work "on their own," they should be very easy to snag in North America, as 20 Meters will be open to them almost 'round the clock, and 15 and 10 will be pipelines for much of the day. The problem areas will be Europe and Asia, where 20 Meters may be the only usable band and openings will be brief. However, 10 Meters is often open from Argentina/Chile into Europe when there is no propagation to North America.



A station signing CE3GN/CEØX was on the air Aug 25, on 20 Meter SSB, but was not legitimate. As for the impending legitimate operation, the list-makers are frothing at the mouth over it, so you might want to check out their frequencies. And unofficial word is that the operators have "been ordered" to be sure to work Chile and South America first!

D E A D L I N E

DON't FORGET that you must get DXCC QSLs to Newington no later than September 28 to have them included in your annual listing in December QST.

Per DXCC Rule 5, if your total is over 250 countries, you may submit any number of new ones before September 28, if you have not already exercised that option earlier in the year.

And also remember that from now on the Honor Roll appears in QST only once a year, in June.

Finally, we have seen the proposed new Honor Roll plaque; it's as we noted earlier, an exact duplicate of the Honor Roll pin, on a wood base, with space for a your callsign engraved on a brass plate. Price and availability of this plaque not yet official.
